Cumulative Index 1980

ABDUCTION DEFORMITY, of hip, in myelomeningocele, Jan., 22–23
Accessory nerve, injuries of, diagnosis and repair in, April, 317
Acclimatization, in athletes, Oct., 850
  to heat, Oct., 711
Acetabular and femoral head disease, combined, Chiari osteotomy in, Jan., 119
Acetabular dysplasia, Chiari osteotomy in, Jan., 114
Acetabulum, anatomic features of, July, 481–482
  fractures of, July, 481–506
    classification of, July, 488–493
    management of, July, 493–501
    operative approaches in, July, 496–501
    pediatric, Oct., 752–753
    postoperative care in, July, 501
    radiologic assessment in, July, 482–487
Achilles tendon, rupture of, diagnosis and treatment of, Oct., 803–806
Acromioclavicular joint, anatomy of, Oct., 729
  arthrography of, Oct., 817
  dislocation of, April, 234–236; Oct., 817
    congenital, and subluxation, April, 228
  injury of, Oct., 730
  separation of, type III, treatment with over-the-shoulder clavicle holder, Oct., 728–732
  surgical approaches to, April, 353–357
  synovectomy of, in rheumatoid arthritis, April, 339
Adduction deformity, of hip, in cerebral palsy, surgery in, Jan., 93
  in myelomeningocele, Jan., 23
Adhesive capsulitis, and stiff and painful shoulder, April, 327–331
  of shoulder, arthrography in, April, 214
Amelia, occurrence of, April, 228
Ankle, fracture-dislocation of, immediate internal fixation in, July, 588
  fractures of, classification of, July, 650
    in adult, internal fixation in, July, 661–679
      surgical technique in, July, 664–671
Ankle (*Continued*)
    medial malleolus in, July, 649–660
  tendons of, injury to, Oct., 801–810
Antibody formation, following replacement therapy, in hemophilic arthropathy, of hip, Jan., 75
Arm, fractures of, immediate internal fixation in, July, 589
Arteries, coronary, anomalous origin of in exercise-related death, Oct., 692, 693
Arthritis, rheumatoid, of shoulder, April, 333–342. See also *Rheumatoid arthritis.*
  septic, acquired dislocation of hip in, Jan., 51–64
Arthrography, of acromioclavicular joint, Oct., 817
  of biceps tendon, April, 212
  in Legg-Calvé-Perthes disease, Jan., 128–129
  of shoulder, April, 205–217
    in adhesive capsulitis, April, 214
Arthropathy, hemophilic, of hip, Jan., 65–77
Arthroplasty, total shoulder replacement, April, 367–373
Arthroscopy, benefits of, for athletic injuries, Oct., 771–772
  of elbow, Oct., 780–781
  of knee, Oct., 772–774
  of shoulder, April, 197–204; Oct., 778–779
  of wrist, Oct., 783
  operative, advantages of, Oct., 797–798
    approaches in, Oct., 792–794
    history of, Oct., 787–788
    instruments for, 791–792
    in the knee, Oct., 794–796
    prerequisites to, Oct., 787–788
    in the shoulder, April, 202–204
Aseptic necrosis, complicating hip fractures in children, Oct., 748
Atony, muscle, in fractures of humerus, April, 250
Avascular necrosis, complicating pediatric femoral neck fracture, Oct., 751–752
  following open reduction, in congenital displacement of hip, Jan., 168

Avulsion fracture, of volar plate, Oct., 821
Axillary lesions, with injury to brachial plexus, diagnosis and repair in, April, 321

BANKART PROCEDURE, in recurrent anterior dislocations, of shoulder, April, 260
"Baseball" finger, Oct., 835
Biceps, lesions of, and tendinitis, of shoulder, April, 343–348
long head of, ruptures of, surgical repair in, April, 359
Biceps tendon, lesions of, arthrography in, April, 212
subluxation of, April, 345–348
Bicipital apparatus, surgical approaches to, April, 359–363
Biomechanics, of ankle joint during walking, Oct., 801–803
of knee, Oct., 765–766
of pediatric hip, Jan., 3–16
Boutonniere deformity, Oct., 822
Brachial plexus, injuries of, below clavicle, diagnosis and repair in, April, 321
injuries of, diagnosis and repair of, April, 309
Bristow procedure, in recurrent anterior dislocations, of shoulder, April, 267

CAPSULITIS, adhesive, and stiff and painful shoulder, April, 327–331
of shoulder, arthrography in, April, 214
Cardiomyopathy, hypertrophic, in exercise-related death, Oct., 692–693
Carpal tunnel syndrome, Oct., 836
Carpometacarpal joint, injury to, Oct., 825
Cerebral palsy, hip in, Jan., 79–104
Cervical plexus, injuries of, diagnosis and repair in, April, 307
Cheilectomy, of pediatric hip, evaluation of results following, Jan., 146–147
postoperative course in, Jan., 146
preoperative indications for, Jan., 141–142
surgical techniques in, Jan., 142–146
Chiari pelvic osteotomy, indications for, Jan., 113–121
principles and technique of, Jan., 105–125
Chondromalacia, of patella, in gymnasts, Oct., 723–724
Circumflex nerve, lesions of, diagnosis and repair in, April, 322
Clavicle, and articulations, injuries of, April, 233–237
congenital anomalies of, April, 226–228

Clavicle (*Continued*)
congenital pseudarthrosis of, April, 226
distal, anterior subluxation of, Oct., 813–814
nerve injuries above, April, 307–321
Cleidocranial dysostosis, development of, April, 226
Compression screw, sliding, in intertrochanteric fractures, of hip, July, 507–523
Congenital anomalies, of scapula, April, 221–226
Congenital glenoid dysplasia, symptoms and management of, April, 221
Congruence, of pediatric hip, Jan., 4
Containment, of pediatric hip, Jan., 8
Contracture, of hip, in cerebral palsy, pathogenesis of, Jan., 85
Coracoclavicular bar, development of, April, 226
Coverage, of pediatric hip, Jan., 9
Coxa magna, Chiari osteotomy in, Jan., 118
Cramps, heat. See *Heat cramps*

DEFORMITY, of hip, in cerebral palsy, effects of, Jan., 88–90
pathogenesis of, Jan., 85–86
Sprengel's, development and management of, April, 223
Dehydration, due to sweat loss, Oct., 709
in wheelchair athlete, Oct., 710
Diaphyseal fractures, of forearm, internal fixation of, July, 381–391
Disability, classification of, Oct., 700
Dislocation(s), acromioclavicular, classification and treatment of, April, 234–236
of hip, acquired, in septic arthritis, Jan., 51–64
congenital, biomechanics of, Jan., 13
in cerebral palsy, Jan., 90
management of, in myelomeningocele, Jan., 23–29
of shoulder, acute and recurrent anterior, April, 253–270
acute anterior, April, 253–259
anterior, with tears of rotator cuff, April, 297
and fracture of greater tuberosity, April, 297–301
chronic recurrent anterior and posterior, arthrography in, April, 215
habitual posterior, April, 271–272
old unreduced, April, 287–294
posterior, April, 271–285
in infancy, obstetric trauma and, April, 280–283
recurrent anterior, April, 259–269
traumatic posterior, April, 273–279

Dislocation and subluxation, of hip, in cerebral palsy, surgery in, Jan., 97
recurrent, following open reduction, in congenital displacement, Jan., 171
of patella, Oct., 755–756
Displacement, of hip, congenital, open reduction in, current methods for, comparative evaluation of, Jan., 161–181
Dysostosis, cleidocranial, development of, April, 226
Dysplasia, acetabular, Chiari osteotomy in, Jan., 114
congenital, of glenoid, symptoms and management of, April, 221

ECHOCARDIOGRAPHY, in athletes, Oct., 690, 691–692
Elbow, arthroscopy of, Oct., 780–781
fractures of, pediatric, July, 407
injuries to, in female gymnasts, Oct., 724–725
Electrocardiogram, patterns of in athletes, Oct., 689–690
Electrolytes, replacement of in athletes, Oct., 850, 851
Exercise, physiology of, Oct., 702–703
Extremity, upper, fractures of, immediate internal fixation in, July, 589

FEMORAL HEAD AND ACETABULAR DISEASE, combined, Chiari osteotomy in, Jan., 119
Femoral head distortion, Chiari osteotomy in, Jan., 119
Femoral neck, fractures of, pediatric, Oct., 748–749
Femoral torsion, in cerebral palsy, pathogenesis of, Jan., 85
medial, pediatric, Jan., 39–50
Femur, distal, and proximal tibia, fractures of, pediatric, July, 407
fractures of, closed treatment of, with fluted Sampson intramedullary rod, July, 593–606
immediate internal fixation in, July, 589
open intramedullary nailing of, July, 623–631
pathologic fractures of, July, 565–566
proximal fractures of, sliding screw fixation in, July, 607–622
shaft of, comminuted fractures of, classification of, July, 634–641
intramedullary nailing in, July, 633–648
postoperative complications in, July, 644–645

Femur (*Continued*)
shaft of, comminuted fractures of, postoperative management in, July, 643–644
surgical technique in, July, 642–643
subtrochanteric fractures of, July, 539–554
biomechanical considerations in, July, 539–541
classification of, July, 562
fixed angle AO blade plates in, July, 549
intramedullary devices in, July, 542
intramedullary fixation in, July, 555–568
operative technique in, July, 555–568
sliding nail plate in, July, 547
treatment in, July, 542–553
Fibrosis, perineural, of ulnar digital nerve of thumb, Oct., 836
Fibula, fractures of, fixation in, July, 662–664
Finger. See *Phalanx(ges), of hand.*
Fixateurs, external, in fractures, in children, July, 417–420
Fixation, immediate internal, in open fractures. July, 569–578. See also *Internal fixation.*
intramedullary, of long bone fractures, device selection in, July, 594
sliding screw, in proximal femoral fractures, July, 607–622
Flexion contracture, of hip, in cerebral palsy, Jan., 88
Flexion deformity, of hip, in cerebral palsy, surgery in, Jan., 92
in myelomeningocele, Jan., 19–22
Foot, fractures of, immediate internal fixation in, July, 585
Forearm, diaphyseal fractures of, internal fixation of, July, 381–391
Fractures, management of, symposium on, July, 379–679. See also specific type of fracture or body area affected.

GALLIE-LEMESURIER PROCEDURE, in recurrent anterior dislocations, of shoulder, April, 266
Glenohumeral joint, surgical approaches to, April, 349–353
Glenoid, abnormal version of, April, 223
dysplasia of, congenital, symptoms and management of, April, 221
Grafting, bone, in open fractures, July, 590
Greater trochanter muscle, contusion of, pediatric, Oct., 744

HAMATE, fracture of, Oct., 834
Hand, athletic injury to, in children, Oct., 837
displaced and unstable fractures of, physiologic fixation of, July, 393–404
distal interphalangeal joint of, dislocation of, Oct., 826–827
distal phalanx of, fracture of, Oct., 829–830
internal fixation of, July, 393
fractures of, immediate internal fixation in, July, 585
metacarpal neck of, fracture of, July, 401
metacarpal phalangeal joint of, dislocation of, Oct., 825–826
metacarpus of, fracture of, Oct., 832–834
phalanges of, middle and proximal shaft fractures of, July, 397; Oct., 830, 831–832
proximal interphalangeal joint of, anatomy of, Oct., 820
injuries of, July, 399
treatment of ligamentous injuries in, Oct., 821
skeletal injury of, July, 393–395
soft tissue injury of, July, 393
tendons of, injury to in athletes, Oct., 835–836
Heart, enlargement of, in athletes, Oct., 690–691
Heart disease, coronary, in exercise-related death, Oct., 693
Heart murmur, detection of, in young athlete, Oct., 688–689
Heat cramps, Oct., 846
treatment of, Oct., 851
Heat exhaustion, Oct., 848
in marathon racers, Oct., 711
treatment of, Oct., 852
Heat stress, cardiovascular response to, Oct., 843–844
Heat stroke, Oct., 711, 848
acute, treatment of, Oct., 853–854
Hemarthrosis, acute, in hemophilic arthropathy, of hip, Jan., 68
Hemolytic reaction, following replacement therapy, in hemophilic arthropathy, of hip, Jan., 74
Hemophilic arthropathy, of hip, Jan., 65–77
fracture in, surgical management of, Jan., 76
genetic and hematologic factors in, Jan., 65–68
surgical management in, Jan., 75–76
Hemorrhage, soft tissue, in hemophilic arthropathy, of hip, Jan., 71
Hepatitis, following replacement therapy, in hemophilic arthropathy, of hip, Jan., 74
Hip, biomechanics of, pediatric, Jan., 3–16
fractures of, pediatric, July, 407
intertrochanteric fractures of, choice of treatment in, July, 534–535
failure of internal fixation in, July, 525–534
osteoporosis in, July, 525–537
radiographic changes in, evaluation of, July, 513–520
sliding compression screw in, July, 507–523
pediatric, symptomatology on, Jan., 1–181
soft tissue of, injuries to in children, Oct., 743–744
subluxation and dislocation of, in cerebral palsy, surgery in, Jan., 97
recurrent, following open reduction, in congenital displacement, Jan., 171
subluxation of, evaluation of, in myelomeningocele, by intertrochanteric varus derotation femoral osteotomy, Jan., 31–37
in cerebral palsy, Jan., 88
traumatic dislocation of, pediatric, Oct., 745–746
complications of, Oct., 748
treatment of, Oct., 747–748
Humeral neck, excessive retroversion or anteversion of, April, 230
Humerus, anatomic features of, April, 239–240
congenital anomalies of, April, 228–230
fractures of, classification of, April, 240–241
complications of, April, 249–252
diagnosis and treatment of, April, 241–249
greater tuberosity of, fracture of, undisplaced, with tears of rotator cuff, April, 301
with anterior dislocation of shoulder, and tears of rotator cuff, April, 297–301
upper, fractures of, April, 239–252
Humerus varus, development of, April, 229
Hybbinette-Eden procedure, in recurrent anterior dislocations, of shoulder, April, 265
Hyperthermia, resulting from dehydration, Oct., 709
Hypothermia, in wheelchair athletes, Oct., 712

INNOMINATE OSTEOTOMY, biomechanics of hip and, Jan., 14–15
Internal fixation, failure of, in intertrochanteric fractures of hip, July, 525–534
immediate, in open fractures, July, 569–578, 579–591
indications for, July, 581–583
infection and, July, 570, 579
methods for, July, 574–577
philosophy of treatment in, July, 572–574
surgical technique in, July, 583–585
with vascular injuries, July, 582
in fractures of ankle, in adult, July, 661–679
Interphalangeal joint, distal, dislocation of, Oct., 826–827
proximal, anatomy of, Oct., 820
injuries of, July, 399
treatment of ligamentous injuries in, Oct., 821
Intertrochanteric fractures, of hip, choice of treatment in, July, 534–535
failure of internal fixation in, July, 525–534
osteoporosis in, July, 525–537
sliding compression screw in, July, 507–523
Intramedullary devices, in subtrochanteric fractures of femur, July, 542
Intramedullary fixation, in femoral fractures, postoperative management in, July, 601–602
rod insertion in, July, 597–601
surgical complications in, July, 603
in long bone fractures, device selection in, July, 594
in subtrochanteric fractures, of femur, July, 555–568
Intramedullary nailing, in comminuted fractures of femoral shaft, July, 633–648
open, of femur, July, 623–631
Intramedullary rod, fluted Sampson, in closed treatment of femoral fractures, July, 593–606

JOINT REPLACEMENT, in rheumatoid arthritis of shoulder, April, 340

KNEE. See also *Patella.*
biomechanics of, Oct., 765–766
diagnostic arthroscopy in, Oct., 772–774
operative arthroscopy in, Oct., 794–796
problems with, in gymnasts, Oct., 723–724

LEGG-CALVÉ-PERTHES DISEASE, arthrography in, January, 128–129
biomechanical effects of, in pediatric hip, Jan., 11–13
prognosis in, Jan., 136–139
treatment in, Jan., 129–134
Ligament, suspensory, of humerus, reconstruction of, April, 357
Long bones, fractures of, intramedullary fixation in, device selection in, July, 594
Low back, pain in, in female gymnasts, Oct., 720–721
Lumbar spine, injuries to, in female gymnasts, Oct., 717–718

MAGNUSON-STACK PROCEDURE, in recurrent anterior dislocations, of shoulder, April, 265
Malleolus, medial, in fractures of ankle, July, 649–660
surgical approach to, July, 650–658
Mallet finger, Oct., 835
Marfan's syndrome, screening for in athletes, Oct., 693
Medial femoral torsion, pediatric, Jan., 39–50
Metacarpal neck, fracture of, July, 401
Metacarpal phalangeal joint, dislocation of, Oct., 825–826
of thumb, injury to, Oct., 823–824
Metacarpus, fracture of, Oct., 832–834
Methyl methacrylate, in fractures of humerus, April, 252
Muscle. See also under specific muscle.
glycogen stores in, Oct., 706
Muscle fiber, type of and athletic activity, Oct., 704–706
Musculocutaneous nerve, lesions of, diagnosis and repair in, April, 323
Myelomeningocele, management of paralytic hip in, Jan., 17–30
Myositis ossificans, in fractures of humerus, April, 250

NAIL PLATE, sliding, in subtrochanteric fractures, of femur, July, 547
Nailing, open intramedullary, of femur, July, 623–631. See also *Intramedullary nailing.*
Nerve, accessory, injuries of, diagnosis and repair in, April, 317
circumflex, lesions of, diagnosis and repair in, April, 322
musculocutaneous, lesions of, diagnosis and repair in, April, 323
suprascapular, injuries of, diagnosis and repair in, April, 319

Nerve lesions, about shoulder, April, 307–326
above clavicle, April, 307–321
below clavicle, April, 321–325
Neuropathy, ulnar, secondary to athletic activity, Oct., 837
Neurovascular bundle, in supra- and infraclavicular lesions, April, 365
Neurovascular deficit, in fractures of humerus, April, 250
Nonunion, in fractures of humerus, April, 249

OBSTETRIC TRAUMA, and posterior dislocation of shoulder, in infancy, April, 280–283
Open reduction, in congenital displacement of hip, approaches in, indications for, Jan., 173–178
complications following, Jan. 168–172
current methods for, comparative evaluation of, Jan., 161–181
history of, Jan., 161–163
rationale for approaches in, Jan., 163–164
techniques in, Jan., 164–168
Osgood-Schlatter's disease, in gymnasts, Oct., 723, 724
Osteochondroses, traction, in younger gymnasts, Oct., 724
Osteonecrosis, in fractures of humerus, April, 250
Osteoporosis, in intertrochanteric fractures, of hip, July, 525–537
Osteotomy, Chiari pelvic sliding, principles and technique of, Jan., 105–125
innominate, biomechanics of hip and, Jan., 14–15
intertrochanteric varus derotation femoral, in evaluation of hip subluxation, in myelomeningocele, Jan., 31–37
varus, biomechanics of hip and, Jan, 13–14

PAIN, low back, in female gymnasts, Oct., 720–721
Paralysis, of hip, management of, in myelomeningocele, Jan., 17–30
patterns of, in cerebral palsy, Jan., 79–83
Patella, recurrent subluxation and dislocation of, associated with athletic injuries, Oct., 755–756
operative treatment for, Oct., 756–759
Patella (*Continued*)
recurrent subluxation and dislocation of, signs and symptoms of, Oct., 760–761
Pelvis, fractures of, classification of, July, 434–451
external fixation in, July, 465–479
management of, July, 454–463
operative versus nonoperative treatment in, July, 423–464
musculoskeletal injury of, July, 426–433
Peroneal tendon, injury of, Oct., 806–809
Phalanx(ges), distal, of hand, fracture of, Oct., 829–830
internal fixation of, July, 393
middle and proximal shaft fractures of, July, 397; Oct., 830, 831–832
Physiology, of exercise, Oct., 702–703
Plating, double, versus single compression plating, in diaphyseal fractures of forearm, July, 381–391
Plexus, brachial, injuries to, below clavicle, diagnosis and repair in, April, 321
injuries to, diagnosis and repair of, April, 309
cervical, injuries of, diagnosis and repair in, April, 307
Prosthesis, for shoulder replacement arthroplasty, selection of, April, 371
Pseudarthrosis, congenital, of clavicle, April, 226
Pseudoboutonniere deformity, Oct., 823
Pseudotumor, of hip, in hemophilic arthropathy, Jan., 69
surgical management in, Jan., 76
Psoas major, in spastic hip subluxation and dislocation, in cerebral palsy, Jan., 86–87
Putti-Platt procedure, in recurrent anterior dislocations, of shoulder, April, 264

RADIOLOGIC ASSESSMENT, in fractures of acetabulum, July, 482–487
in intertrochanteric fractures of hip, evaluation of, July, 513–520
in rheumatoid arthritis of shoulder, April, 336–338
Radioulnar joint, distal, injury to, Oct., 827–828
Radius, fractures of, pediatric, July, 414
Rheumatoid arthritis, of shoulder, April, 333–342
management in, April, 338–342
radiologic findings in, April, 336–338
with synovitis, arthrography in, April, 217
Rod, Sampson intramedullary, fluted, in closed treatment of femoral fractures, July, 593–606

Rotation, center of, of pediatric hip, Jan., 5
Rotation deformity, external, of hip, in myelomeningocele, Jan., 22
medial, of hip, in cerebral palsy, surgery in, Jan., 94
Rotator cuff, rupture of, arthrography in, April, 209
tears of, April, 295–306
chronic, April, 301–305
with anterior dislocation of shoulder, April, 297
and fracture of greater tuberosity, April, 297–301
with undisplaced fracture, of greater tuberosity, April, 301

SALT tablets, for marathon racers, Oct., 711
Sampson intramedullary rod, fluted, in closed treatment of femoral fractures, July, 593–606
Scaphoid, fracture of, Oct., 834
instability of, Oct., 828–829
Scapula, congenital absence of, April, 222
congenital anomalies of, April, 221–226
ossific centers of, nonunion of, April, 223
Scapulectomy, surgical approaches in, April, 354
Scapulocostal mechanism, surgical approaches to, April, 363–365
Screening, cardiac, for participation in sports, Oct., 693
of girls for competitive gymnastics, Oct., 718
Screw fixation, sliding, in proximal femoral fractures, July, 607–622
Septic arthritis, acquired dislocation of hip in, Jan., 51–64
Shoulder, adhesive capsulitis of, April, 327–331
anatomic considerations and examination of, April, 187–195
arthrography of, April, 205–217
arthroscopy, of, April, 197–204; Oct., 778–779
congenital and developmental anomalies of, April, 219–231
dislocations of, acute and recurrent anterior, April, 253–270. See also *Dislocations, of shoulder.*
disorders of, symposium on, July, 185–373
nerve lesions about, April, 307–326
rheumatoid arthritis of, April, 333–342. See also *Rheumatoid arthritis.*
surgery of, arthroscopy in, April, 202–204
Shoulder (*Continued*)
surgery of, approaches to, April, 349–366
synovectomy of, in rheumatoid arthritis, April, 339
tendinitis of, and biceps lesions, April, 343–348
Shoulder girdle, congenital and developmental anomalies of, April, 219–231
Shoulder musculature, developmental anomalies of, April, 230
Shoulder replacement arthoplasty, total, indications, management, and results in, April, 367–373
Sinding-Larsen-Johansson syndrome, in gymnasts, Oct., 723, 724
Soft tissue, of hip, injuries to in children, Oct., 743–744
Spastic hip flexion, in cerebral palsy, conservative treatment in, Jan, 90–91
Spasticity, of hip muscles, functional effects of, in cerebral palsy, Jan., 83–85
Spondylolisthesis, established, in female gymnasts, Oct., 721–722
Sports injuries, symposium on, Oct., 685–855
Sprengel's deformity, development and management of, April, 223
Sternoclavicular joint, injuries of, April, 236–237
surgical approaches to, April, 357–359
Stiffness, following open reduction, in congenital displacement of hip, Jan., 171
joint, in fractures of humerus, April, 250
Stress fractures, definition of, Oct., 735
diagnosis of, Oct., 738–739
incidence of in athletes, Oct., 736–737
pathophysiology of, Oct., 740–741
treatment of, Oct., 740
Subtrochanteric fractures, of femur, July, 539–554. See also *Femur, subtrochanteric fractures of.*
Suprascapular nerve, injuries of, diagnosis and repair in, April, 319
Suspensory ligament, of humerus, reconstruction of, April, 357
Sweat, production of, in wheelchair athlete, Oct., 711
Sweat rate, during exercise, Oct., 709
Synovectomy, of acromioclavicular joint, in rheumatoid arthritis, April, 339

TEMPERATURE, body, during exercise, Oct., 709
regulation of, Oct., 841–843
Tendinitis, of shoulder, and biceps lesions, April, 343–348
Tendon. See also under specific tendon, of ankle, injury to, Oct., 801–810

Tendon (*Continued*)
of hand, injury to in athletes, Oct., 835–836
Tension band plating, versus double plating, in diaphyseal fractures of forearm, July, 381–391
Thrombosis, following replacement therapy, in hemophilic arthropathy, of hip, Jan., 74
Thumb, metacarpal phalangeal joint of, injury to, Oct., 823–824
Tibia, distal, fractures of, in children, July, 412
proximal, and distal femur, fractures of, in children, July, 407
shaft of, fractures of, immediate internal fixation in, July, 588
Tibial tendon, anterior, injury of, Oct., 809
posterior, injury of, Oct., 809–810
Torsion, femoral, in cerebral palsy, Jan., 88
medial femoral, pediatric, Jan., 39–50
Training, athletic, effect on cardiovascular factors, Oct., 706–707
of female gymnasts, Oct., 718–720
Trauma, obstetric, and posterior dislocation, of shoulder, in infancy, April, 280–283
skin and musculoskeletal, in wheelchair athletes, Oct., 712–714

ULNA, fractures of, pediatric, July, 414

VARUS DEROTATION FEMORAL OSTEOTOMY, intertrochanteric, in evaluation of hip subluxation, in myelomeningocele, Jan., 31–37
Varus osteotomy, biomechanics of hip and, Jan., 13–14
Vascular injuries, in open fractures, immediate internal fixation and, July, 582
Volar plate, avulsion fracture of, Oct., 821
and collateral ligament, partial tear of, Oct., 820–821

WHEELCHAIR, efficiency of mobility in, Oct., 707
Wheelchair marathon racing, preparation of medical personnel for, Oct., 702
Wheelchair sports, current research on, Oct., 714–715
history of, Oct., 697–698
physician's role in, Oct., 699
skin and musculoskeletal trauma to participants in, Oct., 712–714
Wrist, arthroscopy of, Oct., 783
